The American Physical Society

Rate Change Science Origins: Center of the Universe KENNETH STRICKLAND, Rate Change Science — A re-organization and modernization for rate of change brings into focus a location for the center of the universe. Information needed to understand the physics is already known. RCS concentrates on building a universe rather than reverse engineering the milestone moments of time. RCS sees the big bang too but unfurls through the building of “Default Matter Objects”. The analysis reveals a wealth of knowledge including the geometrical center object and the physical center object in our universe. At the heart of the center object is dark matter.
