Abstract for an Invited Paper
for the APR21 Meeting of
the American Physical Society

Lattice QCD in the EIC Era

WILLIAM DETMOLD, MIT

In this talk, I will discuss the current status of lattice QCD calculations relevant to the EIC science program as well as expectations for calculations in the lead-up to EIC data taking. In particular I will focus upon the areas of partonic physics in nucleons and nuclei and on the origin of the mass of the proton.
