Abstract for an Invited Paper  
for the BPNMC20 Meeting of  
the American Physical Society

### **Creating Effective Resumes for Physics Careers**

CRYSTAL BAILEY, American Physical Society

Physics students graduate with a huge array of transferrable skills, which are extremely useful to employers (particularly in the private sector, which is the largest employment base of physicists at all degree levels). However, the key to successfully connecting with these opportunities lies in how well graduates are able to communicate their skills and abilities to potential employers. In this workshop we will focus on writing an effective resume for non-academic careers.
