

Abstract Submitted
for the CAL10 Meeting of
The American Physical Society

The Unified Field of Energy Is A Physical Structure, Filling up ALL KNOWN and KNOWABLE SPACE/TIME. The Physical Operating System of the Universe. ALFY S. SOURIAL — A Standard Elementary Particle, “SEP” - of certain specifications - is being suggested as: The plausible building unit of “A Material structure for Spacetime: the Aether.” At the same time it physically represents the Unified Field of Energy. The thesis reintroduces the theory of “A Material Aether”, and Defines its possible structure as: A necessary and mandatory medium for the Execution of ALL PHYSICAL PROCESSES: Thus starting, a new language of Physics: THE LOGISTICS OF PHYSICS. Such physical structure PREDATES THE BIG BANG. The Big Bang can only happen inside a pressure cooker created by the material Aether’s shear Inertia. The same “Standard Elementary Particle,” is being suggested as a plausible origin of: All Simple Subatomic Particles, of Conventional Matter: [the current 200-odd], and their derivation from such a standard particle, through minor modification of their: Orientation, Degree of Compression, Rate of Spin, and Degree of “Freedom of Motion,” depending on its surroundings. Compound Subatomic Particles such as “Baryons” are a combination of two, three or four of such modified “Standard Elementary Particles.” Bound together in a specific way, around A central non spinning SEP: “Higgs Boson,” the Author’s “Noumenon”. Clumps of Higgs Bosons as the origin of Dark Matter and Galactic Black Holes. Incidentally, It is impossible to isolate Higgs Boson, Without creating a Baryon.
