

Abstract Submitted
for the DAMOP15 Meeting of
The American Physical Society

From Planck Constant to Isomorphicity Through Justice Paradox¹ WIDASTRA HIDAJATULLAH-MAKSOED², Prodi of Physics, University of Indonesia- Depok 16424, Indonesia — Robert E. Scott in his “**Chaos theory and the Justice Paradox**”, William & Mary Law Review, v 35, I 1, 329 (1993) writes”... As we approach the 21-st Century, the signs of social disarray are everywhere. Social critics observe the breakdown of core structure – the nuclear family, schools, neighborhoods & political groups”. For completions for “soliton” first coined by Morikazu TODA, comparing the “Soliton on Scott-Russell aqueduct on the Union Canal near Heriot-WATT University, July 12, 1995 to Michael Stock works: “**a Fine WATT-Balance: Determination of Planck constant & Redefinition of Kilogram**”, January 2011, we can concludes the inherencies between ‘chaos’ & ‘soliton’. Further through “string theory” from Michio KAKU sought statements from Peter Mayr: **Stringy world brane & Exponential hierarchy**”, JHEP 11 (2000): “if the 5-brane is embedded in flat 10-D space time, the 6-D Planck mass on the brane is **infinite**” who also describes the relation of isomorphicity & “string theory”, from whom denotes the **smart city**. Replace this text with your abstract body.

¹Incredible acknowledgments to HE. Mr. Drs. P. SWANTORO & HE. Mr. Dr-HC Jakob OETAMA

²Devotes the April 2, 2008 Tributes from HE. Mr. H. BAMBANG TRIANTORO to CEO of PT. PINDAD[Persero], HE. Mr. ir. SILMY KARIM,ScD
