The American Physical Society

The mass, energy, space and time system of Wave, Particle and universe -MEST DAYONG CAO, Beijing Natural Providence Science & Technology Development CO., LTD — Things have their own system of mass, energy, space and time of themselves. (The MEST for short thereafter). Mass is density, energy is force, time is frequency, space is amplitude square. New mass-energy wave equation, space-time particle equation are being put forward. Mass, Energy, Space (Radius), Time (Period) of nine planes compose a MEST of plane; Mass (Density of sun), Energy (Gravity of sun), Space (Radius of nine planes), Time (Period of nine planes) compose other MEST of sun. MEST can unite both wave equations of nine planes and particle equations of sun. Mass, Energy, Space (Radius), Time (Period) of electron of H compose a MEST of electron; Mass, Energy (coulombic force), Space (Radius of electron), Time (Period of electron) compose other MEST of nucleon of H. MEST can unite both wave equations of electron of H and particle equations of nucleon of H. MEST can unite both wave equations of electron of H and wave equations of nine planes. Dark matter-energy is from Black hole. Because Black hole have a applied thrust to it, So its quantity that be estimated is bigger than it's in fact. There are a lot of asteroids and dark matter-energy near the orbit of Jupiter. They will impacted near our earth, when Dark matter-energy changes the orbit of these asteroids. It is a recurrent action. Because there is a interaction between black hole and the solar system.
