The American Physical Society

Considerations Concerning the Overall Unification SHANTILAL GORADIA, Gravity Research Institute, Inc. — The direction of the century old search, based on non- probabilistic gravity, for the unification of forces blockades the search for consciousness at a fundamental level. Probabilistic gravity deriving strong coupling from a quantum mechanically modified inverse square law of gravity, and derivation of the fine structure constant's $1/137$ by a computational route throw light on the quantum source of consciousness as explained in the book by this author (Quantum Consciousness - The Road to Reality) containing more details. Spooky action is a natural consequence of non local probabilistic gravity. I will show how this constitutes a play on the shoulders of the giants.
