Charge Symmetry Breaking Electromagnetic Nucleon Form Factors in Elastic Parity-Violating Electron-Nucleus Scattering\textsuperscript{1} GERALD A. MILLER, Physics Department, University of Washington, Seattle — The effects of charge symmetry breaking in nucleon electromagnetic form factors on parity-violating elastic electron-\textsuperscript{12}C scattering is studied, and found to be much smaller than other known effects. The analysis of a planned experiment is discussed.

\textsuperscript{1}I thank US Department of Energy Office of Science, Office of Nuclear Physics under Grant No. DE-FG02-97ER- 41014.
