for the MAR06 Meeting of
The American Physical Society

Cold Fusion A 17 Year Retrospective MICHAEL C. H. MCKUBRE,
FRANCIS L. TANZELLA, SRI International, Menlo Park, CA. — Seventeen years
after the APS voted to refute the reality of Cold Fusion in Baltimore, it is appropriate
to consider what has changed. Who was right? We will review the current state of
knowledge from the perspective of what we know now compared to what we knew
then. Discussion will be made of various avenues of research that have followed
from the original Fleischmann-Pons proposal: some failed, some unresolved and
some successful.
