

Abstract Submitted  
for the MAR06 Meeting of  
The American Physical Society

**Referee Training Session** DONAVAN HALL, Physical Review Letters, ALISON LOUDON, Physical Review B, DANIEL UCKO, Physical Review Letters — Representative editors from Physical Review Letters and the Physical Review will provide useful information and tips for referees. The information presented will be relevant to anyone who has recently been asked to referee for a Physical Review journal, or who would like to add to their knowledge and experience of the refereeing process. It will also be of interest to authors who want to know more about the referee reports they receive. Topics we will cover include: (1) how to write a good referee report, (2) the differences between reports for PRL and the PR journals, (3) the role of the referee in the review process, (4) how to submit a referee report, (5) how to use the referee web interface, etc. Following the short presentations from the PRL and PR editors, there will be a moderated discussion where you can ask questions relevant to refereeing.
