

Abstract Submitted
for the MAR07 Meeting of
The American Physical Society

Implementing a New Undergraduate Course: Biophysics MITRA
SHOJANIA FEIZABADI, Canisius College — One of the objectives at Canisius
College is to introduce students to the big picture of interdisciplinary collaboration
early in their academic career. In support of this, the new course, biophysics, was
developed, approved and offered by the physics department. Taking advantage of
the experiences gained in introducing this course, I will discuss different aspects of
the course and further steps which can be taken to heighten student retention of the
information and the overall effectiveness of the course.
