Neutron scattering studies of the quantum critical point of 
\textbf{CeAuSb}_2

University of California, Irvine, H. LE, WEI BAO, LANL, YOUN-JUNG JO, LUIS 
BALICAS, NHMFL — We present neutron scattering results on CeAuSb$_2$, a quantum 
critical material whose critical point is revealed in magnetic field. We find 
incommensurate ordering, indicative of itinerant electron physics. The incommen-
surate feature seem to be directly related to metamagnetic transitions.
