

Abstract Submitted
for the MAR09 Meeting of
The American Physical Society

Physics Q & A — APS's latest publication, *Physics* (<http://physics.aps.org/>), highlights exceptional papers from the Physical Review journals. Each week, editors from the journals choose papers that merit this treatment, aided by referee comments and internal discussion. *Physics* features expert commentaries written by active researchers who are asked to explain the results to physicists in other subfields. These commissioned articles are edited for clarity and readability across fields and are accompanied by explanatory illustrations. Please join us for a session that will include a brief presentation by the editors of *Physics* followed by a Q and A.
