Metal Catalyzed Fusion: Nuclear Active Environment vs. Process TALBOT CHUBB, Physicist Consultant, 5023 N. 38th St., Arlington, VA 22207 — To achieve radiationless dd fusion and/or other LENR reactions via chemistry: some focus on environment of interior or altered near-surface volume of bulk metal; some on environment inside metal nanocrystals or on their surface; some on the interface between nanometal crystals and ionic crystals; some on a momentum shock-stimulation reaction process. Experiment says there is also a spontaneous reaction process.
