

Abstract Submitted
for the MAR14 Meeting of
The American Physical Society

Imagine a Dream of Love, Ripple¹ JERRY A. (TONY) WITT², 9083L Drywall/Lathers Union — MATH 1st, $Mc^2/r^2 = E/r = 2/.5 = 1 < 3$, (< 3) is a heart (feelings matter, thanks!). this equation shows that or 3 dimensional universe is also the singularity enfold(ed)ing and unfold(ed)ing unto itself. (c^2) needing space being rate is distance distance over time, also a square being a flat surface of no depth would make the universe which has a mass flat in all directions simultaneously quantum (G) I believe. (r) being half distance would illustrate a double inversion being $2 + 1 = 3$, as in dimensional reality. A double inverse expressing a reverse, thus Verlinde's principal should be a simple law rather than a question. Equal and opposite forces cancelling, motion requiring initial force all points connected as a singularity as well as dimensional cancelling one another out as well as fueling motion, as supported by Doug Singleton's, Perpetuum Mobile paper. bringing into question thermodynamic laws heat more likely exhausted energy, motion rate being a matter of relative energy use as well as rate in accordance with Verlinde's and Singleton's works (thanks and thanks again Doug). I should mention Hawking and Al are two of the funnest guys ever, physics is phun.

¹Title is of the music and some of the hearts that have guided this path. John, Dr. King, Bob, favorite Grateful Dead song. Family, friends, kids (friends), 9083L strength fare treatment for labor being self respect.

²I have outlined a test for this theory, it's a simple pass or fail to avoid arguement. said test would bring with it a new portable clean energy process, major profits of which should go towards education, environmental, and peace foundations. PonDeR
