

Abstract Submitted  
for the MAR14 Meeting of  
The American Physical Society

**Serving Physicists and the STEM Community: What is the Future of the Science Library?** RACHEL BESARA, Florida State University Libraries — What are the academic work behaviors and needs of physicists and the STEM Community? How are science libraries already used? What assumptions and approaches to information access and control need to be challenged? What does this mean for the future of library support for physics? These are just some of the questions being addressed by research at Florida State University Libraries. Learn how the findings of these studies addresses these questions and what the findings could mean for the future of library support for science research and teaching.
