Abstract for an Invited Paper  
for the MAR15 Meeting of  
the American Physical Society

### **Autonomy**

D.A. VAN BAAK, TeachSpin, Inc.

Advanced-laboratory experiences have long been a formative part of the undergraduate curriculum, and this presentation reviews some of the purposes that they serve. One under-acknowledged purpose for these laboratories is the role they serve in cultivating students' capacity for exercising autonomy as scientists. Overt recognition of this implicit purpose of laboratory courses has implications for the organization and execution of such courses.
