

Abstract Submitted  
for the MAR16 Meeting of  
The American Physical Society

**Lithium Melt Line Determined using the Z Method** MARVIN  
ZOCHER, LEONID BURAKOVSKY, Los Alamos National Laboratory — The Z  
method is a numerical procedure that can be used for the construction of phase  
diagrams. In the present work the method is discussed and its use is demonstrated  
through a determination of the melt line for lithium.
