

Abstract Submitted
for the MAR16 Meeting of
The American Physical Society

OIST - A New Model of Graduate Education. NEIL CALDER,
Okinawa Institute of Science and Technology — I would present the Okinawan
Institute of Science and Technology Graduate University. The Graduate University
offers outstanding opportunities for students looking to study for a Ph.D. I would
outline what makes OIST different from other Graduate Schools and explain the
opportunities for students but also the posts open for Faculty. The Okinawa Institute
of Science and Technology is an interdisciplinary graduate school offering a 5-year
PhD program in Science. Over half of the faculty and students are recruited from
outside Japan, and all education and research is conducted entirely in English.
