Quantum Consciousness – The Road to Reality SHANTILAL GORADIA, Retired — Per Einstein's theory mass tells space how to curve and space tells mass how to move. How do they tell? The question boils down to information created by quantum particles blinking ON and OFF analogous to 'Ying and Yang' or some more complex ways that may include dark matter. Consciousness, dark matter, quantum physics, uncertainty principle, constants of nature like strong coupling, fine structure constant, cosmological constant introduced by Einstein, information, gravitation etc. are fundamentally consequences of that ONE TOE. Vedic philosophers, who impressed Schrodinger so much, called it ATMA split in the categories of AnuAtma (particle soul), JivAtma (life soul) and ParamAtma (Omnipresent soul) which we relate to quantum physics, biology and cosmology. There is no separate TOE (Theory of Everything) for any one thing [1]. [1] Quantum Consciousness The Road to Reality, Journal of Life Sciences 10 (2016) (doi: 10.17265/1934-7391/2016.06.001).
