Abstract for an Invited Paper  
for the MAR17 Meeting of  
the American Physical Society

### **Career Paths for Physics Degree Recipients**

PATRICK MULVEY, American Institute of Physics

Physics degree holders have a diverse set of career opportunities open to them. So what are these opportunities? Where are they employed? How much do they earn? What skills will they need? Physics degrees make up a small proportion of the degrees conferred in the US but they play an important role in meeting workforce needs at many levels. This talk will give an overview of the employment outcomes of physics bachelors, masters and PhDs. It will discuss the diverse set fields they work in and the skills they use.
