Abstract for an Invited Paper
for the MAR17 Meeting of
the American Physical Society

Quantum Monte Carlo in Materials Science: Electronic Structure¹

WILLIAM LESTER, JR, University of California, Berkeley

Background on quantum Monte Carlo for the electronic structure of molecular systems will be presented. Aspects of the computational algorithm will be discussed. Selected applications will be described to provide insight on the capability of the method.

¹*Calculations were carried out at the U. S. National Energy Research Supercomputer Center (NERSC).
