Abstract for an Invited Paper
for the MAS17 Meeting of
the American Physical Society

Taking the Universe's Baby Picture

DAVID SPERGEL, Princeton Univ Flatiron Institute

I will discuss how observations of the cosmic microwave background, the left-over heat from the big bang, have help establish the standard model of cosmology. I will look forward to upcoming observations that have the potential to test our ideas about the universes beginning and provide new insights into the nature of dark energy and dark matter.
