

Abstract for an Invited Paper
for the APR05 Meeting of
The American Physical Society

Mentoring minorities in physics

JORGE LOPEZ, University of Texas at El Paso

This talk will present a summary of recruiting and retention programs existing at the University of Texas at El Paso. These programs, which support the participation of students in research, have been successful in increasing the number of minorities in graduate programs. Particular emphasis will be given on cases related to physics majors interested on nuclear physics.
