Results from the Einstein@Home search of the LIGO S4 data set BRUCE ALLEN¹, Albert Einstein Institute, Hannover, Germany & U. Wisconsin – Milwaukee, LIGO SCIENTIFIC COLLABORATION — We present the results of an all-sky blind search for continuous gravitational waves generated by rapidly-spinning neutron stars. The search was carried out using 510 hours of data from LIGO’s fourth science run S4, using computer time donated by the general public. Since Einstein@Home was launched in 2005, more than 100,000 volunteers have contributed over 100 million CPU hours to the project.

¹for the LIGO Scientific Collaboration.
