

Abstract Submitted
for the NEF06 Meeting of
The American Physical Society

Why the Game Clock Only Goes Forward DOUGLAS SWEETSER,
none — The laws of physics are indifferent to time going in reverse, while referees
are not. The one exception, the 2nd law of thermodynamics, needs the asymmetry
put in by hand. This segment of the community access TV show “The Stand-Up
Physicist” explains why there is an arrow to spacetime. Briefly, the space part of
spacetime gives spacetime reversal a handedness.
