

Abstract Submitted
for the NEF06 Meeting of
The American Physical Society

Can Exceptional, Visually Impaired Graduate Students, Educationally Funded by their use of Initially Profit-free Franchised Naturopaths, be Recruited to Proposed Native American Universities, and their Mentor Partners with Joint-degree Agreements? NADJA FERREIRA¹, Camaragibe, PE, Brazil, DAVID MCLEOD, Bastyr Univ., ROGER MCLEOD, Univ. Mass. Lowell — Naturoptic Vision Improvement Methods developed and first propagated in the Americas can be transferred to other locales, particularly to Germany, Austria, and German-speaking areas of Switzerland, and to British (or former) Commonwealth areas, France, Greece, Russia, and diverse areas of Africa and Asia, particularly Japan. The method will attempt to mimic any successful transplants already in progress, or in the planning stages. It will consist primarily in recruiting visually impaired students who have finished their undergraduate work, and who are outstanding enough to be admitted into an appropriate university of their choice. Joint-degree linkages with universities in mentoring agreements with any potential universities, naturopathic or otherwise, are among our favorites. Potential faculty for proposed universities will have longer term use of an appropriate franchise in some profit- free franchisor agreements.
