

Abstract Submitted  
for the NEF07 Meeting of  
The American Physical Society

**Schizophrenia: Do Sense Perceptions Correlate with Episodic Activity, as Indians Know Kokopelli/Pele Matches with Mother Earth's Electromagnetic Field Activity, EMF?** ASPEN MCCULLEY, SAGAMO PAWA MATAGAMON<sup>1</sup>, Univ. Mass. Lowell, DAVID MATTHEW MCLEOD<sup>2</sup> — Certain Indian cognomens seem to indicate an environmental awareness of an electromagnetic wrath some traditional cultures are careful to acknowledge and accommodate. These include Pele/Kokopelli, Keitan, and Hobomock, that have carried explicit information our cultures have been cognizant of Mother Earth's not-always-benign influences. Let's consider schizophrenia, with or without a viral cofactor, and Kokopelli/Pele. She/he may be explicitly referenced as a hunch-backed, flute-playing individual, dancing-around in correlation with Earth's electromagnetic activities. Depending on the specific version and its details, individuals, particularly children, are admonished to avoid certain areas. Of especial importance and relevance may be cultural awareness that individuals, whom another type of culture has discriminated against, despite no a priori guilt, are explicitly absolved of culpability by the blanket statement that The Great Spirit is implicated in their behavior. Of course, this provides information of a religious sort, possibly corroborated by a currently prominent individual.
