for the NEF09 Meeting of
The American Physical Society

Is Atmospheric Carbon Dioxide Causing Global Warming? PETER GLANZ, Rhode Island College — Every knowledgeable scientist will stipulate that global temperatures are rising (0.7° the last century). There are those that see a universal scientific consensus that atmospheric CO_2 is the culprit; they have put in place a cap-and-trade system to forcibly reduce anthropogenic CO_2 in the USA. What is the scientific evidence behind this volatile issue?
