

Abstract Submitted  
for the NEF11 Meeting of  
The American Physical Society

**“Global Warming/Climate Change”: A Critical Look** LAURENCE  
I. GOULD, University of Hartford — There continues to be an increasing number of  
scientists from around the world who are challenging the dominant claim that has  
been bolstered by so-called “consensus” scientific views – that dangerous “global  
warming/climate change” is caused primarily by human-produced carbon dioxide.  
This poster will show scientific evidence contradicting that claim. It will also explain  
some of the errors that have been introduced from a corruption of the scientific  
method. (Further information can be found at <http://uhaweb.hartford.edu/lgould/>)
