The American Physical Society

Quark model with Fractional electric charge is Wrong AHMAD
REZA ESTAKHR, Researcher — Up-Type Quarks are electrically uncharged (0).
only Down-type Quarks are electrically charged and have integer electric charge of
plus or minus one (+1,-1) $D^\pm \rightarrow U^0 + W^\pm$. For example Neutron beta decay:
 $n_{(D+D-U^0)}^0 \rightarrow p_{(D+U^0U^0)}^+ + W^-$ (only delta baryon is not consisted with my model
of quarks with integer electric charge. perhaps quark content of delta baryon is
wrong!.)
