Did Secret, Sacred Science: “Kokopelli/Pamola,” Motivate the Tarratines’ Assassination of the Penobscots’ Bashaba ca 1615, and Does “Orono” Yield Direct Physics Insights? ITALANI ATAIDE, BEATRIZ DE SOUZA, Camaragibe, PE, Brazil, SAGAMO PAWA MATAGAMON¹, Univ. Mass. Lowell — “Tarratine” may share cognate phonetics with Tatoosh, (Makah, Pacific NE), Tuitan, Totonac, (coastal “neighbors” of the Aztec), Teedyuscung/Tatiuskundt, (Penn.), Teotihuacan, Tomtomhegan, (“ME” ca 1781-2), Titikaka/Titicaca, and Tantaquidgeon, (Conn.); the military action that led to the assassination of the Penobscots’ Bashaba has explanatory roots tying it to the last raid involving ‘Indian’ military action of the Revolutionary War. “Turf” rights influenced conflict imperatives. Preserved linguistic roots have it best: Ñari Huallac, coupled with Arizona, Allagash, Allahpatah, and Orono/Orinoco, indicate traditionalists’ information, by recognizing Kokopelli/Pamola/Pele/electromagnetics/EMF, says how nature behaves. Penobscots and modern Peruvian descendants of the Incas have it right: the concealed “Serpent God” of their EMF alter ego(s), says their science, (applied physics) is sacred because it “predicts” nature, even tinnitus, via “Rawandagon”!

¹Roger D. Mc Leod, aka Sagamo Pawa Matagamo, will present all papers here.
