

Abstract Submitted  
for the NES09 Meeting of  
The American Physical Society

**Physics Theorynet Outreach Program**<sup>1</sup> PER BERGLUND, University of New Hampshire — Physics Theorynet is an outreach program, funded by the National Science Foundation, involving particle theorists and cosmologists visiting with high school students and teachers in the greater Boston area, including New Hampshire and Rhode Island. Its main component is the direct interaction between physicists, students and teachers through presentations, demonstrations and question and answer sessions during regular class hour visits and after class. We will report on the accomplishments of Theorynet to date, and present the long term goals and plans for the future.

<sup>1</sup>Supported in part by the National Science Foundation under grant PHY-0600304
