The Naturoptic Method for Safe Recovery of VisionTM: Mentored Tutoring, Earnings, Academic Entity Financial Resources Tool
NICOLE D. SAMBURSKY, ROGER DAVID MCLEOD, University Massachusetts Lowell/Naturoptics, SANDRA HELENA SILVA¹, Goiânia, Goiás, Brazil/ Naturoptics — This is a novel method for safely and naturally improving vision. with applications for minority, female, and academic entity, financial advantages. The patented Naturoptic Method is a simple system designed to work quickly, requiring only a minimal number of sessions for improvement. Our mentored and unique activities investigated these claims by implementing the Naturoptic method on ourselves over a period of time. Research was conducted at off campus locations with the inventor of the Naturoptic Method. Initial visual acuity and subsequent progress is self assessed, using standard Snellen Eye Charts. Research is designed to document improvements in vision with successive uses of the Naturoptic Method, as mentored teachers or Awardees of “The Kaan Balam Matagamon Memorial Award,” with net earnings shared by the designees, academic entities, the American Indians in Science and Engineering Society, AISES, or charity. The Board requires Awardees, its students, or affiliates, to sign non-disclosure agreements. 185/1526
