

Abstract Submitted  
for the NMC16 Meeting of  
The American Physical Society

**Understanding Students' Racial Experiences in College STEM and Developing Racial Competence.** CHANDRA TURPEN, University of Maryland, ANGELA LITTLE, Michigan State University, JESUS PANDO, DePaul University — In this workshop, we will engage in learning, action, and reflection around race and racism. We will support participants in examining educational spaces through the lenses of race and ethnicity. We aim to examine how our experiences learning and doing physics have been racialized, from individual/interpersonal biases to systemic/structural aspects of institutions. We will end by exploring possibilities for action within our mentoring roles and institutional contexts.
