

Abstract Submitted  
for the NWS05 Meeting of  
The American Physical Society

**Do they know if they know?** BRIAN PYPER, FRANTISEK PLASIL,  
BYU-Idaho Dept. of Physics — Can students tell when they've learned something?  
We gave 7 questions to a group of 36 students. The questions were selected from  
the topic (momentum and kinetic energy) taught in their class the week before  
the data was collected. Each question was accompanied by a confidence question.  
Students answered the questions using an anonymous classroom electronic personal  
response system. We looked for correlations between student responses and how  
confident they were in their response. This presentation will discuss the results of  
this preliminary research.
