Abstract for an Invited Paper
for the NWS12 Meeting of
the American Physical Society

Physics 433: Undergraduate laboratory in Biological Physics at Simon Fraser University

NANCY FORDE, Department of Physics, Simon Fraser University

In this talk, I will describe our senior undergraduate lab course in Biological Physics at Simon Fraser University. Unique in Canada, this course combines modules that teach the students basic molecular and cell biology and leading-edge biophysical techniques with independent student projects. I'll outline the structure and components of the course, provide an overview of each experimental module, and describe student interest and feedback.
