

NWS15-2015-020008

Abstract for an Invited Paper  
for the NWS15 Meeting of  
the American Physical Society

**Nuclear Forces from Quantum Chromodynamics**

MARTIN SAVAGE, Institute for Nuclear Theory, University of Washington

I will discuss the state-of-the-art Lattice QCD calculations of quantities of interest in nuclear physics, the binding of light nuclei, their magnetic moments and polarizabilities and a recent calculation of np radiative capture. Also, I will discuss progress that is expected in the near future, and the anticipated impact.
