Abstract for an Invited Paper
for the NWS17 Meeting of
the American Physical Society

Making the Transition from Academic Physics to the Private Sector

JEFF SCHULTE, Digimarc Corporation

The transition from physics in academia to the private sector is one that a significant percentage of physics students will make. In this talk I'll share some of my own experiences making the transition to a private sector software engineering role and some lessons learned along the way. I'll also provide an overview of the digital watermarking technology that I work on in my current role.
