

Abstract Submitted  
for the NWS18 Meeting of  
The American Physical Society

**Gravity, Simple As Possible, But Not Simpler<sup>1</sup>** JERRY WITT<sup>2</sup>,  
None — All points are universal center as gravity bends space and time about  
itself, Hawking. All is in motion relative to all other points center, or relative  
to the observer, Einstein (Al). Entropic Derivation of  $f=ma$  in Circular Motion.  
Essentially, the universe is made up of energy, motion, time, space, and gravity.  
And, by using the formula for a sphere's volume as Gravity's naturalest, most natural  
shape in the spatial universe is a sphere. Well, I'd like to explain and show the math  
that accounts for gravity being the singularity, or the non cancelled 4th physical  
dimension being the singularity was never cancelled, we it's energy, and gravity it's  
singularly connected proof. Well, at least to a better than 99% accuracy.

<sup>1</sup>Well, I should probably say thanks to my brothers at 9083L Drywall/Lathers and  
our brothers (and sisters) at Carpenter's 701 for uh, well without them, who knows,  
maybe be thought of a slave labor to pharaohs or sumthtyn. Making this trip to  
share ide

<sup>2</sup>Give the little guy a listen through. His questions could be a spark to some you  
haven't asked, and possibly nobody else has of yet answered.

Jerry Witt
