

Abstract Submitted
for the OSF05 Meeting of
The American Physical Society

Introducing the Unified Physical Field Theory N. GLENN
GRATKE, Milwaukee School of Engineering — With the physical medium of space
(now called the ‘Cosmic Continuum’) supporting Einstein’s ‘Total Field’, we can
develop a ‘Field String Model’ of particle formation. ‘Cosmic Continuum Mutable
Solitons’ (to be called ‘Cosmutons’) form the elementary particles within our single
universe of three spacial dimensions.
