

Abstract Submitted  
for the OSF09 Meeting of  
The American Physical Society

**Using letters to the editor to try to bring science to the public** GORDON AUBRECHT, Ohio State University — The local paper here, the Delaware Gazette, publishes many letters from global warming skeptics and people ignorant of energy policy. I explain how I attempt to bring some sense to the situation through reply letters to the editor. Scientists need to express scientific views in public as our duty to fellow citizens.
