

Abstract Submitted  
for the OSF11 Meeting of  
The American Physical Society

**The Least Particle Theory** ROBERT HARTSOCK, Retired — The Least Particle Theory states that the universe was cast as a great sea of energy. MaX Planck declared a quantum of energy to be the least value in the universe. We declare the quantum of energy to be the least particle in the universe. Stephen Hawking declared quantum mechanics to be of no value in todays gross mechanics. That's like saying the number 1 has no place in mathematics.
