

Abstract Submitted
for the OSF14 Meeting of
The American Physical Society

Dealing with more climate myths GORDON AUBRECHT, Ohio State University at Marion — Many scientists understand that climate change has a sociopolitical aspect, but some scientists are unwilling to address the issue lest they be perceived as political themselves. Nevertheless, when we scientists find climate myths, I think it is our duty as scientists to be willing to debunk them. A poster at YSU on this topic was well received (Myths 1—7). This poster exhibits some more climate myths and contrasts them with the science.
