

Abstract Submitted  
for the OSF19 Meeting of  
The American Physical Society

**A Blog as Ancillary Material for a Physics Textbook** BRADLEY ROTH, Oakland University — Nowadays, textbooks come with many ancillary materials: solution manuals, student guides, etc. A unique ancillary feature is a blog. A blog allows you to keep your book up-to-date, to expand on ideas covered only briefly in your book, to point to other useful learning materials such as websites, articles and other books, and to interact directly with students using your book.
