Abstract for an Invited Paper  
for the PHYSTC16 Meeting of  
the American Physical Society

**Recruiting More Physics Education Majors at the University of Wyoming<sup>1</sup>**

DANIEL DALE, University of Wyoming

The University of Wyoming has recently ramped up its recruitment of future high school physics teachers. One effort focuses on training local high students to develop and give public shows in our new digital planetarium. Another effort recruits STEM-educated officers from a local military base to our Noyce program. We will report on all our activities and our latest numbers of physics education majors and post-baccalaureate students pursuing physics teacher certification.
