

Abstract Submitted
for the PHYSTC16 Meeting of
The American Physical Society

The OK PhysTEC Collaborative¹ STEVEN MAIER, JENNIFER SATTTLER, NWOSU — The OK PhysTEC Collaborative consists of the four PhysTEC member institutions of Oklahoma. The goal of the project is to increase the number of physics education candidates statewide over a three-year span (2014/15 – 2016/17 academic years). To do this, high school and undergraduate students are being recruited into physics and science education programs. In addition, support for travel to physics education conferences is offered to high school teachers, undergraduate physics students, and in-service physics teachers. Participating institutions include Northwestern Oklahoma State University (lead institution), East Central University, Oklahoma State University, and Southwestern Oklahoma State University. In this poster, recruitment efforts to date will be reported, along with summaries of enrollments, program changes motivated by the project, and challenges that remain.

¹The OK PhysTEC project is supported by a PhysTEC Recruitment Grant
