Abstract for an Invited Paper
for the PHYSTC19 Meeting of
the American Physical Society

How to be Political: Overcoming Barriers, Securing Resources

THEODORE HODAPP, American Physical Society

Establishing and building a teacher education program takes time, money, and a bit of “working the system.” Being political is not about appeasement, but it is about understanding the system and its personalities, and reading the tea leaves of change. This workshop will invite you to share issues you face and hear about practical and creative solutions that have worked at other institutions.
