

Abstract Submitted
for the PHYSTEC17 Meeting of
The American Physical Society

Recruiting Physics Education Majors at the University of Wyoming¹ DANIEL DALE, University of Wyoming — The University of Wyoming has strengthened its recruitment of future high school physics teachers. One of our efforts focuses on training local high students to develop and give public shows in our digital planetarium. Another effort recruits STEM-educated officers from a local military base to our Noyce program. We will report on all our activities and our latest numbers of physics education majors and post-baccalaureate students pursuing physics teacher certification.

¹This work is supported by the National Science Foundation under PhysTEC, the Physics Teacher Education Coalition.
