

Abstract Submitted
for the PSF15 Meeting of
The American Physical Society

“FUSION/FISSION In MITOCHONDRIAL DYNAMICS”¹ WH-MAKSOED², Prodi of Physics University of Indonesia, Depok 16424- INDONESIA — Mitochondria contain of the order of 1400 different proteins as 2 membrane-enclosed organelle instead in JE Dominy&PPuigserver:” **Mitochondrial Biogenesis through Activation of Nuclear Signaling Proteins**” stated “Fusion & fission allow the incorporation of mtDNA..”. From “fusion/fission factors regulating mitochondrial” & “mitochondrial-driven themogenesis” denotes “mitochondrial dynamics & carbonaceous chondrite” contains 600 organic compounds of stony (non-metallic) meteorites imply Tony SKYRME who discovers skyrmion/dromion-sinceWW II dromedary duty delivers. Refers to mesoscopic physics, FQHE & multifractals, for those non-metallic sought “ such as the persistent current in isolated mesoscopic normal metal rings penetrates by an AB[Aharonov-Bohm] flux”- Zhu & Wang, *Phys. Rev. A*, , v 53,n 1. For gauge/group theory, MC Dramantini, *et.al* explains: “zero-temperature physics of planar Josephson junction array in the self-dual approximation is governed by an Abelian gauge theory..” guides Prof. Sediono MP Tjondronegoro to the Max Planck Society.

¹Acknowledgment devotes to theLates HE. Mr. BrigadierGeneral-TNI[rtd]. H. Ing. Tb. A. ZOEHRI

²Intends to re-originates INDONESIA Inc., through ”allow the incorporation of mtDNA...”
